

Red Splendor Crabapple

Malus hybrids

- **Plant Characteristics:** This is a semi-weeping, spreading tree.
- **Size:** Height: 20 ft. to 30 ft.
Width: 10 ft. to 30 ft.
- **Foliage:** dark reddish green foliage turning reddish purple in fall.
- **Flower:** Long lasting, showy, single
 - Rose-red buds produce pale pink to rose pink blooms, 1 4/5" diameter.
- **Fruit:** Bright red , 1/2" in diameter, persistent into the winter.
- **Soil:** Heavy loams, highly adaptable. Well-drained, moist and acid.
- **Tolerances:** Moderately drought tolerant
- **USDA Hardiness Zone:** Zone 3
- **Light Range:** Full Sun ☀️
- **pH:** 5.0–6.5 pH
- **Other:**
 - require little pruning which should be completed before early June
 - initiate flower buds for the next season in mid-June to early July and pruning at this time or later would result in decreased flower production for next year
 - used for windbreaks and wildlife cover
